## **Netis DL43 Series**

- Establish a connection between the device and the router via network cable or Wi-Fi (if there's a WIFI password you have to check bottom of the router. If you turn the router over, you should see a sticker, and one of the pieces of information should say something like "Wi-Fi Password" or "WPA passcode.")
- Open your web browser and enter http://192.168.1.1 in the browser address bar
- Type Username: guest and password: guest to login to modem's interface
