

## Huawei EchoLife-HG521

- Establish a connection between the device and the router via network cable or Wi-Fi
- Open your web browser and type the default IP Address 192.168.1.1 in the address bar
- You will be prompted to enter Username: admin and Password: admin

The screenshot shows the login interface for the Huawei EchoLife Home Gateway. The page has a white background with a grey header bar containing the Huawei logo and the text 'EchoLife Home Gateway'. The main content area contains a login form with two input fields: 'Username' and 'Password', both containing the text 'admin'. Below the fields is a warning message: 'Please enter your username and password.' At the bottom, there are two buttons: 'Login' and 'Cancel'. A red arrow points to the 'Login' button.

- Expand Basic then click WLAN and make sure WLAN is enabled
- In SSID textbox type wireless name and make sure SSID is enabled
- Select WPA2-PSK as Security mode and in WPA Pre-Shared Key type wireless password then click Submit (safest passwords are long and contain at least 8 digits of mixed letters, and numbers)
